Projects

Levick 23 - https://levick.africa/

Successfully developed Levick 23, an online clothing store utilizing React JS for an interactive and dynamic user interface, Ruby on Rails for efficient backend processing, and PostgreSQL for secure and organized data management. Personally implemented key features ensuring a seamless shopping experience and integrated secure payment gateways for customer transactions. The project showcases my ability to create a user-friendly platform that meets the unique needs of an online retail environment.
